

## IMPERIAL HOSPITALITY

**Imperial Hospitality is a comprehensive software suite consisting of integrated modules for various aspects of property management.**

**Imperial Hospitality Software combines best of breed functionality with seamless, all-in-one integration.**

The System is designed for a small to mid-sized facility. The system manages, controls and monitors daily activities thus streamlining the functions of the property.

Imperial Hospitality is software designed for full service luxury inns, bed and breakfasts, resorts, and private clubs. It emphasizes the highest level of individual guest services through our comprehensive features seamlessly integrating rooms, dining, and retail, with information contained in reservations till back office general ledger.

The integrated system helps the clubs in providing high class services to the members without getting into hassles of administrative tasks.
